| **Riskontrol**  | **Brite Shield™ Ultrasonic Cleaner** PREMIER  |
| Pierre Rolland  | Suitable for use as a static soak or ultrasonic cleaner. Removes light stains, all resins and cements and protects against rust and corrosion. Brings instruments back to a glorious lustre. |
| Disposable and flexible tips for the multifunction syringe. | 800gm Jar with scoop dispenser |
| White Tips      | PRE11100    |
| PR-200275       |             |

| **Safe Tips® EZ™**  | **Isopropyl Alcohol** DENTALIFE  |
| SDS Kerr          | A general purpose alcohol that provides antibacterial, cleaning and solvent properties in the surgery. Comprised of 70% Isopropyl Alcohol and 30% purified water it is suitable for cleaning, surface and instrument preparation. |
| Disposable air/water syringe that is interchangeable with most metal tips. No conversion necessary. Includes 5x spare O rings in packages. | Clear 70% 5 Litre |
| Dispenser Pack 150 Tips | DL0901 |
| KER44150           |             |

| **Seal-Tight™**  | **Solvitan** VOCO  |
| SDS Kerr         | A highly effective, skin friendly, ready to use cleaning agent with citrus fruit aroma. It is suitable for the removal of paste, silicone or polyether-based impression material from hands and instruments. Can be used for general application in both dental surgeries and laboratories. |
| A Disposable Air/Water syringe tip system that provides infection protection plus dry air on demand. The self sealing rubber water channel acts as a new O ring every time. | 250ml bottle |
| Dispenser Pack 200 Tips | VOC2312 |
| KER77200          |             |

| **Vacusan** PROGRESS  | **Puli-Jet** CATANIA  |
| A non toxic, non corrosive enzyme-based cleaner, designed specifically to clean, sanitise and deodorise internal components of all dental surgery suction equipment. | A disinfectant solution especially formulated for the cleaning and deodorising of dental aspirator lines. Its active ingredients have been specifically selected to ensure all plastic and rubber components remain undamaged in the cleaning process. |
| 5 litres PRO900  | 1 Litre CLK0065 |

| **Vac Attak™** PREMIER  | **Solvitan** VOCO  |
| High performance evacuation system cleaner, especially effective in removing prophylactic paste and fluoride gels, the two most common causes of blockages. | A highly effective, skin friendly, ready to use cleaning agent with citrus fruit aroma. It is suitable for the removal of paste, silicone or polyether-based impression material from hands and instruments. Can be used for general application in both dental surgeries and laboratories. |
| 800 gram jar with scoop dispenser | 250ml bottle |
| PRE11101                | VOC2312 |

INFECTION CONTROL

**DETERGENTS**

**Mediclean**

A non-toxic, hospital grade neutral detergent that provides a streak free finish on all surfaces. It is a clear liquid with a light lemon fragrance. Coupled with Viraclean, Mediclean makes for simplification of the cleaning and disinfection process.

500ml
WHI130204

**Sonidet**

The most widely used neutral instrument detergent in Australia. Ideal for use in ultra-sonic machines and the manual cleaning of instruments, Sonident is an integral part of the sterilisation process. It is odourless, non staining and is a safe detergent for the removal of all surgical soils.

5 Litre
WHI190377

**Ultrasoak**

A specially formulated dual-purpose neutral detergent concentrate used as an immersion solution to help remove materials from instruments.

5 Litres
PRO905

**Clinicare Neutral Detergent Sachets**

Neutral detergent products formulated to address tough clinical cleaning situations.

Dispenser Pack - Contains 50 x 30ml Sachets
DL2605

**Clinicare Neutral Detergent Wipes**

<tr>
<td>Attest Biological Indicator Blue</td>
<td>The indicator vial is placed in or on the autoclave pouch or instrument cassette and measures the microbial killing power of a sterilisation process. The Blue indicators are used in benchtop sterilisers where the come up time to temperature is equal to or less than 1 minute. The Brown indicators are for use in sterilisers where the come up time is greater than 1 minute. In sterilisers where both wrapped and unwrapped items are being processed, the Brown indicator is the correct one to use.</td>

<tr>
<td>Bowie Dick</td>
<td>A product to assess air removal and steam penetration in pre vacuum autoclaves. It does not prove sterility but shows whether the vacuum system of an autoclave is operating correctly. It is recommended that all class B autoclaves be tested on a daily basis as part of normal Quality Assurance measures.</td>
<td>Pack 20</td>

<tr>
<td>Comply® Chemical Indicator Strips Refill</td>
<td>These indicators are placed inside a pouch or instrument cassette and indicate whether the sterilant has penetrated the pack. The colour changes from off white to black when fully processed. It does not verify sterility but allows detection of certain procedural errors and equipment malfunctions.</td>

<tr>
<td>Qlicksmart Flask Scalpel Blade Remover</td>
<td>Designed for single-handed operation, this device combines the process of removal, containment and disposal of scalpel blades in one simple procedure. Once removed the blade has no further human contact. It is designed for use with most #3, #4, #7 and #9 scalpel blades. It comes with a progressive counter and will remove a maximum of 100 blades and includes an automatic shut off mechanism to prevent over filling. A universal wall bracket is available separately that can be used to mount the device on a wall, bench or trolley.</td>
