Contemporary Dental Bridges
Choosing the right bridge design with the right dental material for the right patient.
Presented by Dr Ben Lee

COURSE OUTLINE
Fixed dental bridges have been a proven treatment option for the replacement of missing teeth for many years. When carried out correctly on a suitable patient, one can achieve an excellent long-term result. To improve treatment outcomes, this course will primarily discuss how to choose the right bridge design with the right dental material for the right patient.

All clinical steps from bridge preparation to cementation will be shown via video footage. This course also includes an extensive hands-on component for the participants.

COURSE TOPICS
- Case selection – when is a dental bridge a feasible option?
- When is a semi-fixed bridge design suitable?
- When is an all-ceramic bridge suitable?
- How to improve Maryland bridge outcome?
- Tips and tricks on teeth preparation, impression and provisionalisation for dental bridges.

LEARNING OBJECTIVES
- To be competent at assessing a suitable patient to receive a dental bridge
- To understand different bridge designs and when to choose each design
- To understand different dental materials and when to choose each material

ABOUT THE PRESENTER
Dr Ben Lee completed his MDSc in Prosthodontics from University of Sydney. During this time he was given the Young Prosthodontist Award by The International College of Prosthodontists. He is the past president of the Australian Prosthodontic Society (NSW) and Australian Asian Association of Dentists.

In addition being a visiting honorary Clinical Lecturer at the University of Sydney, a frequent presenter for Nobel Biocare, Ben frequently presents on the topic of dental implants and fixed prosthodontics on a national basis. As a prosthodontist, Ben works full-time in his referral based specialist practice in Chatswood, Sydney with particular interest in the surgical and restorative aspects of dental implant treatment.
