COURSE OUTLINE

Rubber dam usage promotes ergonomics, operator and assistant health by minimising aerosol spread of bacteria, patient comfort and safety, documented better clinical outcomes versus no rubber dam, and the highest level of medico-legal protection.

Rubber dam saves clinical time and provides the optimum environment for the placement of restorative materials. In our changing regulatory environment, the use of rubber dam is now mandatory for routine endodontic treatment.

This course will teach you rapid and simplified techniques of rubber dam application from single tooth isolation to quadrant dentistry in a full ‘hands-on’ environment complemented by lectures and clinical notes. It encourages a team approach and the participation of your dental assistant is encouraged.

LEARNING OBJECTIVES

At the conclusion of the course you will be able to:
• Choose between a clamp and clamp-less technique
• Select the correct clamp for a given clinical situation
• Select the correct weight of rubber dam for the specific clinical procedure
• Treat 90% of endodontic cases with just four clamps
• Achieve single tooth isolation for endodontics in 30 seconds
• Isolate multiple teeth with a variety of techniques
• Recognise and prevent rubber dam leaks
• Manage problems such as class V restorations and broken down teeth
• Utilise your dental assistant in the most efficient manner with rubber dam

ABOUT THE PRESENTERS

Dr Steven Cohn is a specialist endodontist in Sydney. He received both his dental degree and certificate of specialist training in endodontics from Columbia University in New York. Steve has taught endodontics at Sydney University and Westmead Hospital at both the undergraduate and postgraduate levels since 1979 while maintaining a private specialist practice. He is the former Director of Postgraduate Endodontics at the University of Sydney and was a member of the Committee for Continuing Education in Dentistry at the University of Sydney for over 15 years. Steve developed the Snapex radiography system in 1978, has lectured widely nationally and internationally and authored numerous publications.

Dr Rick Spencer graduated from The University of Sydney in 1980 with honours and the K.P McKinnon Prize for Proficiency in Clinical Prosthetic Dentistry. After working in England and Rural NSW he has been working in general practice in Sydney since 1987. Rick is a presenter in The University of Sydney’s Continuing Education in Dentistry program, in both the use of Microscopes and Rubber Dam utilisation for restorative dentistry. He is also Clinical Educator in the Dental Undergraduate Program, and has been since 1989.

Barbara Faulkner started as a casual dental nurse in 1987 while still at school. She attained a degree in Arts B.A. (Hons) from the University of Sydney. Since the introduction of the microscope into Dr. Spencer’s practice in 2002, Barbara has helped to integrate and develop treatment protocols, including training other nurses in four handed dentistry specific to microscope enhanced practice. Also Barbara has over twenty years’ experience with routine rubber dam usage.

DATE
Thursday, 29 November 2018

TIME
8:30am - 12:30pm

3.5 CPD HOURS

VENUE
Centre for Professional Development
1 Atchison Street
St Leonards NSW

COSTS incl GST
ADA Member $495
Accompanying Assistant $250
Non Member $594

Includes refreshments
